

# Michael Azlen CAIA

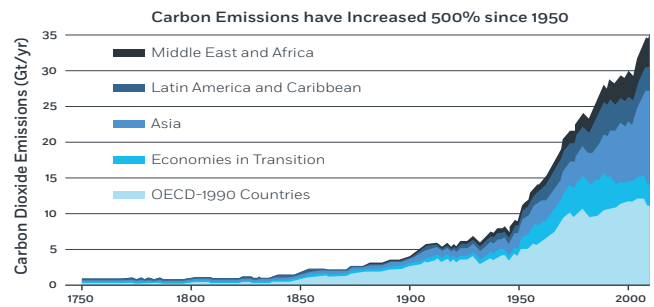

## Conference Topic and Speaker Profile

### Conference Topic: Climate Change: Investing for the Future

Michael will provide a highly educational presentation on Climate Change guiding the audience through the scientific evidence as well as the potential impacts on society and public equity and debt markets. He will review how governments and policy makers are responding to the threat and highlight the specific risks and opportunities created by climate change. Finally, he will summarize and provide actionable steps that investors, risk managers and business leaders need to consider.

### Climate Change: Investing for the Future

- Background: The Science of Climate Change
- Potential Impacts: Counting the Cost
- The Global Policy Response: The Paris Agreement
- Investment Opportunities and Risks
- Summary and Actionable steps

### Climate Change Background

As we have seen from recent record-breaking heatwaves and the increased incidences of droughts and wildfires, our climate is changing rapidly due to human generated greenhouse gas emissions. In response, more than 190 countries have signed the “Paris Agreement” aimed at limiting emissions and substantial progress is being made with renewable energy sources. However, global emissions continue to rise. The next 10 to 20 years are the most important period for mankind to make substantial and sustainable emissions reductions and the urgency of this objective cannot be overstated as the potential impacts to our society

*“Once climate change becomes a defining issue for financial stability, it may already be too late”*

Mark Carney, Governor Bank of England

*“Concerns must now urgently be translated into actions to credibly manage the systemic challenges posed by climate change”*

Sir Christopher Hohn, TCI
